Fire-Fighting Instructions: Do not release runoff from fire control methods to sewers or waterways.

Fire-Fighting Equipment: No special equipment required.

Section 6 - Accidental Release Measures

Spill /Leak Procedures: People not wearing protective equipment should be excluded from the area until the clean-up has been completed. Clean up spills promptly. Surfaces can be slippery.

Small Spills: Absorb liquid on paper, floor absorbent, vermiculite or other absorbent material and remove to waste storage containers.

Large Spills

Containment: For large spills, stop spill at source, dike far ahead of liquid spill to prevent spreading. Do not release into sewers or waterways.

Cleanup: Pump to salvage or waste disposal tank. Remaining liquid may be taken up on sand, earth or other absorbent material and shoveled into containers.

Regulatory Requirements: Follow applicable OSHA regulations (29 CFR 1910.120).

Section 7 - Handling and Storage

Handling Precautions: Empty containers of this material may contain product residue. All precautions in this data sheet must be observed. Wash hands before eating or smoking.

Storage Requirements: Keep from freezing.

Regulatory Requirements: Check local, state and federal requirements.

Section 8 - Exposure Controls / Personal Protection

Engineering Controls: NE

Ventilation: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (Sec. 2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

Administrative Controls: NE

Respiratory Protection: Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or nonroutine operations (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. *Warning! Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.* If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit-testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas.

Protective Clothing/Equipment: Wearing chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact is recommended. Wear protective eyeglasses or chemical safety goggles, per OSHA eye- and face-protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses.

Safety Stations: Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Contaminated Equipment: Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment.

Comments: Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics.
