

Key Float Art Sign Off Sheet.

Made by Enthusiasts
for Enthusiasts.™

Please Print this sheet to review your logo size and scale relative to the Key Float

Email sales@hardlineproducts.com
or FAX at 805-581-0022. We must have
a signed copy to produce your keyfloat.
What you submit and sign is what we
print.

Art is acceptable Yes _____ No _____

Float Color _____

Ink Color _____

Two sided Yes No

Name _____

Date _____

All artwork must be submitted ready to print as is.

We will make our best attempt to center the image on the Key float unless otherwise indicated. We will give you a digital proof like the sample above with your logo on it for your approval. We will not print without your approval.

We only accept High resolution AI, EPS and PDF files. We need your file to have been created in Adobe Illustrator (or another drawing program) and saved as an EPS or AI file. All fonts must be saved as "Outlines". Files created in Photoshop or taken off the internet (rasterized) will print with jagged edges on all sides of the graphics. If we do not have a vector file (made from dots) we will have to regenerate the artwork at a \$65 per hour fee.

If your artwork is wrong and you sign off on the proof then your Key float will print wrong. What you submit is what we print. **YOU CAN NOT RETURN KEY FLOATS FOR A REFUND.** All files must be one color setup. No dropshadows, outlines or fades.

The live area (printable area) on the key float is 1" high by 2" long. These are approximate sizes but close. Small fonts under 10 pts. will not reproduce well. Consider re-arranging your art based on the oval and printable area or ask us for our suggestions.

Any questions please contact me at the numbers below.
